Thin Solid Films 310 (1997) 335–339

thin solid films

Subject Index of Volume 310

Acoustic microscopy
Nondestructive acoustic microcharacterisation of heteropolysiloxane thin films, 203
Acoustic velocities
Nondestructive acoustic microcharacterisation of heteropolysiloxane thin films, 203
Aerosol-gel
The effect of thermal annealing on aerosol–gel deposited SiO_2 films: a FTIR deconvolution study, 47
α-helix
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102
Alloys
A spin wave resonance study on reentrant $Au_{77}Fe_{23}$ films, 289
Alumina
The dependence of hardness on the density of amorphous alumina thin films by PECVD, 260
Amorphous
Large-grain polycrystalline silicon thin films obtained by low-temperature stepwise annealing of hydrogenated amorphous silicon, 67
The dependence of hardness on the density of amorphous alumina thin films by PECVD, 260
Amorphous materials
Characterization of fluorine-doped silicon dioxide film by Raman spectroscopy, 167
Anisotropy
A spin wave resonance study on reentrant $Au_{77}Fe_{23}$ films, 289
Annealing
A study of the effects of annealing and outgassing on hydrogenated amorphous silicon, 156
Influence of annealing on the ferroelectric properties of Pt/Pb-$(Zr,Ti)O_3$/Pt thin film capacitors, 327
Argon
Effects of argon and oxygen addition to the CH_4–H_2 feed gas on diamond synthesis by microwave plasma enhanced chemical vapor deposition, 39
ATR IR-spectroscopy
Conformation and orientation analysis of modified polyglutamates in thin films by ATR infrared spectroscopy, 138

Bacteriorhodopsin
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102
Band edges
Magneto-transport in porous silicon, 94
Band structure
Change of light holes valence band in lead–tin telluride films by isovalent substitution of chalcogen atoms, 194
Borides
Generation of boride layers on steel and nickel alloys by plasma activation of boron trifluoride, 244
Boronizing coatings
Generation of boride layers on steel and nickel alloys by plasma activation of boron trifluoride, 244

Cadmium selenide
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Cadmium sulphide
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Carbon
Temperature-dependent Hall analysis of carbon-doped GaAs, 63
Catalysis
Porphyrin LB film as a catalyst for alkene epoxidation, 296
Charging
Stability and behavior of poly-1-naphthol films towards charge transfer reactions, 208
Chemical vapor deposition
Electrochemical behaviour of molybdenum coated with flame CVD polycrystalline diamond film, 217
Low-temperature growth and orientational control in RuO_2 thin films by metal-organic chemical vapor deposition, 75
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
Chemical vapor deposition (CVD)
Effects of argon and oxygen addition to the CH_4–H_2 feed gas on diamond synthesis by microwave plasma enhanced chemical vapor deposition, 39
Clusters
Preparation and characterisation of silver particulate films on softened polystyrene substrates, 97
Coatings
Effects of $p(O_2)$ and $p(CO_2)$ on epitaxial growth of $BaTiO_3$ thin films on MgO(100) substrates by using metal organic acid salts, 199
Porphyrin LB film as a catalyst for alkene epoxidation, 296
Preparation of $AlVO_4$-films for sensor application via a sol–gel/spin-coating technique, 228
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
Contacts
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Corrosion
Corrosion behavior and microstructure of titanium implanted with α and β stabilizing elements, 251
Determination of the relative surface areas of PVD coatings by electrochemical impedance spectroscopy, 87
Electrochemical behaviour of molybdenum coated with flame CVD polycrystalline diamond film, 217
Crystallization
Effects of $p(O_2)$ and $p(CO_2)$ on epitaxial growth of $BaTiO_3$ thin films on MgO(100) substrates by using metal organic acid salts, 199

Elsevier Science S.A.

Residual stress in silicon films deposited by LPCVD from disilane, 234
Current-measurement technique
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102

Deposition
The effect of thermal annealing on aerosol–gel deposited SiO_2 films: a FTIR deconvolution study, 47
Diamond
Effects of argon and oxygen addition to the CH_4–H_2 feed gas on diamond synthesis by microwave plasma enhanced chemical vapor deposition, 39
Electrochemical behaviour of molybdenum coated with flame CVD polycrystalline diamond film, 217
Dichroism
Conformation and orientation analysis of modified polyglutamates in thin films by ATR infrared spectroscopy, 138
Diffusion
Stability and behavior of poly-1-naphthol films towards charge transfer reactions, 208

Elastic properties
Nondestructive acoustic microcharacterisation of heteropolysiloxane thin films, 203
Electrical properties and measurements
Charge conduction process and photovoltaic effects in thiazole yellow (TY) thin film based Schottky devices, 279
Influence of annealing on the ferroelectric properties of Pt/Pb-(Zr,Ti)O_3/Pt thin film capacitors, 327
Temperature-dependent Hall analysis of carbon-doped GaAs, 63
Temperature-dependent surface potentials of fluorinated alkanethiolate self-assembled monolayers, 24
Electrochemistry
Characterization of polyacrylonitrile films grafted onto nickel by ellipsometry, atomic force microscopy and X-ray reflectivity, 148
Determination of the relative surface areas of PVD coatings by electrochemical impedance spectroscopy, 87
Stability and behavior of poly-1-naphthol films towards charge transfer reactions, 208
Electron spin resonance (ESR)
A spin wave resonance study on reentrant $Au_{77}Fe_{23}$ films, 289
Ellipsometry
Characterization of polyacrylonitrile films grafted onto nickel by ellipsometry, atomic force microscopy and X-ray reflectivity, 148
Emission responses
Acoustic emission responses of plasma-sprayed alumina-3% titania deposits, 108
Epitaxial growth
Epitaxial growth of Pd/Fe/Pd trilayers onto sapphire, 81
Epitaxy
Effects of $p(O_2)$ and $p(CO_2)$ on epitaxial growth of $BaTiO_3$ thin films on MgO(100) substrates by using metal organic acid salts, 199
Epitaxial growth of titanium oxide thin films on MgO(100) single-crystal substrates by reactive deposition methods, 184
Etching
Influence of annealing on the ferroelectric properties of Pt/Pb-(Zr,Ti)O_3/Pt thin film capacitors, 327

Fe layers
Epitaxial growth of Pd/Fe/Pd trilayers onto sapphire, 81
Ferroelectric properties
Influence of annealing on the ferroelectric properties of Pt/Pb(Zr,Ti)O_3/Pt thin film capacitors, 327
Films
Surface characterization of titanium oxide films synthesized by ion beam enhanced deposition, 29
Fluidization
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
Fluorine (fluorides)
Temperature-dependent surface potentials of fluorinated alkanethiolate self-assembled monolayers, 24
Fourier-transform infrared spectroscopy
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102

Gallium arsenide
Temperature-dependent Hall analysis of carbon-doped GaAs, 63

Hardness and packing density
The dependence of hardness on the density of amorphous alumina thin films by PECVD, 260
Heteroplysiloxanes
Nondestructive acoustic microcharacterisation of heteropolysiloxane thin films, 203
High temperature X-ray diffraction
Phase formation process of Ir_xSi_{1-x} thin films. Structure and electrical properties, 8
Hydrogenated amorphous silicon
A study of the effects of annealing and outgassing on hydrogenated amorphous silicon, 156
Hysteresis loop
Influence of annealing on the ferroelectric properties of Pt/Pb(Zr,Ti)O_3/Pt thin film capacitors, 327

Insulators
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Internal field
Influence of annealing on the ferroelectric properties of Pt/Pb(Zr,Ti)O_3/Pt thin film capacitors, 327
Ion beam enhanced deposition
Surface characterization of titanium oxide films synthesized by ion beam enhanced deposition, 29
Ion implantation
Corrosion behavior and microstructure of titanium implanted with α and β stabilizing elements, 251
Fabrication of excimer laser annealed poly-Si thin film transistor by using an elevated temperature ion shower doping, 317
Iridium silicides
Phase formation process of Ir_xSi_{1-x} thin films. Structure and electrical properties, 8

Langmuir–Blodgett films
Luminescence properties of the Langmuir–Blodgett film of terbium(III) stearoylanthranilate, 274
Porphyrin LB film as a catalyst for alkene epoxidation, 296
Langmuir–Blodgett technique
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102
Large grain polycrystalline silicon
Large-grain polycrystalline silicon thin films obtained by low-temperature stepwise annealing of hydrogenated amorphous silicon, 67
Laser irradiation
Fabrication of excimer laser annealed poly-Si thin film transistor by using an elevated temperature ion shower doping, 317
Luminescence
Luminescence properties of the Langmuir–Blodgett film of terbium(III) stearoylanthranilate, 274

Sputter deposition of ZnS:Mn/SrS:Ce multilayered thin film white phosphor, 123

Magnetic properties
Morphological changes induced by thermal anneals in NiFe/Ag multilayers; their relation to the resistive and magnetoresistive properties, 171
Magnetic properties and measurements
A spin wave resonance study on reentrant $Au_{77}Fe_{23}$ films, 289
Molecular beam epitaxy (MBE)
Change of light holes valence band in lead–tin telluride films by isovalent substitution of chalcogen atoms, 194
Molecular ordering
Conformation and orientation analysis of modified polyglutamates in thin films by ATR infrared spectroscopy, 138
Monolayers
Change of light holes valence band in lead–tin telluride films by isovalent substitution of chalcogen atoms, 194
Porphyrin LB film as a catalyst for alkene epoxidation, 296
Temperature-dependent surface potentials of fluorinated alkanethiolate self-assembled monolayers, 24
MR
Magneto-transport in porous silicon, 94
Multilayers
Morphological changes induced by thermal anneals in NiFe/Ag multilayers; their relation to the resistive and magnetoresistive properties, 171
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Sputter deposition of ZnS:Mn/SrS:Ce multilayered thin film white phosphor, 123

Nanostructures
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
The crystalline properties of nitrogen doped hydrogenated microcrystalline silicon thin films, 322
Nickel
Characterization of polyacrylonitrile films grafted onto nickel by ellipsometry, atomic force microscopy and X-ray reflectivity, 148
Nitrogen
The crystalline properties of nitrogen doped hydrogenated microcrystalline silicon thin films, 322

Optical properties
Characterization of fluorine-doped silicon dioxide film by Raman spectroscopy, 167
Effect of Nb, Cr, Sn additions on gas sensing properties of TiO_2 thin films, 161
Influence of conventional furnace and rapid thermal annealing on the quality of polycrystalline β-$FeSi_2$ thin films grown from vapor-deposited Fe/Si multilayers, 115
Optical properties of silver, gold and aluminum ultra-thin granular films evaporated on oxidized aluminum, 265
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Preparation and characterisation of silver particulate films on softened polystyrene substrates, 97
Organic substances
Luminescence properties of the Langmuir–Blodgett film of terbium(III) stearoylanthranilate, 274
Orientation analysis
Conformation and orientation analysis of modified polyglutamates in thin films by ATR infrared spectroscopy, 138
Outgassing
A study of the effects of annealing and outgassing on hydrogenated amorphous silicon, 156
Oxidation
Epitaxial growth of titanium oxide thin films on MgO(100) single-crystal substrates by reactive deposition methods, 184
Oxides
Preparation of $AlVO_4$-films for sensor application via a sol–gel/spin-coating technique, 228
Oxygen
Effects of argon and oxygen addition to the CH_4–H_2 feed gas on diamond synthesis by microwave plasma enhanced chemical vapor deposition, 39

Pd layers
Epitaxial growth of Pd/Fe/Pd trilayers onto sapphire, 81
Phase formation
Phase formation process of Ir_xSi_{1-x} thin films. Structure and electrical properties, 8
Phosphorus
Fabrication of excimer laser annealed poly-Si thin film transistor by using an elevated temperature ion shower doping, 317
Phosporus
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Photoconductivity
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Photovoltage
Analysis of Au-, Al-, and Sn/Si semiconductor devices with thin oxide layer by photocurrent measurements, 177
Charge conduction process and photovoltaic effects in thiazole yellow (TY) thin film based Schottky devices, 279
Physical vapor deposition (PVD)
Epitaxial growth of titanium oxide thin films on MgO(100) single-crystal substrates by reactive deposition methods, 184
Plasma processing and deposition
Generation of boride layers on steel and nickel alloys by plasma activation of boron trifluoride, 244
Structures and vapor-sorption characteristics of sputtered polychlorotrifluoroethylene films treated by hydrogen-plasma, 303
Plasma-sprayed alumina
Acoustic emission responses of plasma-sprayed alumina-3% titania deposits, 108
Plasmons
Optical properties of silver, gold and aluminum ultra-thin granular films evaporated on oxidized aluminum, 265
Polyglutamate
Conformation and orientation analysis of modified polyglutamates in thin films by ATR infrared spectroscopy, 138
Polymers
Characterization of polyacrylonitrile films grafted onto nickel by ellipsometry, atomic force microscopy and X-ray reflectivity, 148
Stability and behavior of poly-1-naphthol films towards charge transfer reactions, 208
Structures and vapor-sorption characteristics of sputtered polychlorotrifluoroethylene films treated by hydrogen-plasma, 303
Porous silicon
Magneto-transport in porous silicon, 94
Purple membrane
Limited rotational diffusion caused by frictional interaction among purple membrane fragments in a highly concentrated purple membrane solution spread over a water surface, 102
PVD
Determination of the relative surface areas of PVD coatings by electrochemical impedance spectroscopy, 87

Raman scattering
Characterization of fluorine-doped silicon dioxide film by Raman spectroscopy, 167

The crystalline properties of nitrogen doped hydrogenated microcrystalline silicon thin films, 322
Reflection spec.
Optical properties of silver, gold and aluminum ultra-thin granular films evaporated on oxidized aluminum, 265
Resistivity
Morphological changes induced by thermal anneals in NiFe/Ag multilayers; their relation to the resistive and magnetoresistive properties, 171
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Ruthenium oxide
Characterization of ultrasonic spray pyrolysed ruthenium oxide thin films, 57
Low-temperature growth and orientational control in RuO_2 thin films by metal-organic chemical vapor deposition, 75

Sapphire
Epitaxial growth of Pd/Fe/Pd trilayers onto sapphire, 81
Schottky barrier
Analysis of Au-, Al-, and Sn/Si semiconductor devices with thin oxide layer by photocurrent measurements, 177
Charge conduction process and photovoltaic effects in thiazole yellow (TY) thin film based Schottky devices, 279
Semiconductors
Analysis of Au-, Al-, and Sn/Si semiconductor devices with thin oxide layer by photocurrent measurements, 177
Temperature-dependent Hall analysis of carbon-doped GaAs, 63
Sensors
Effect of Nb, Cr, Sn additions on gas sensing properties of TiO_2 thin films, 161
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Preparation of $AlVO_4$-films for sensor application via a sol–gel/spin-coating technique, 228
Structures and vapor-sorption characteristics of sputtered polychlorotrifluoroethylene films treated by hydrogen-plasma, 303
Silicides
Influence of conventional furnace and rapid thermal annealing on the quality of polycrystalline β-$FeSi_2$ thin films grown from vapor-deposited Fe/Si multilayers, 115
Silicon
Fabrication of excimer laser annealed poly-Si thin film transistor by using an elevated temperature ion shower doping, 317
Residual stress in silicon films deposited by LPCVD from disilane, 234
The crystalline properties of nitrogen doped hydrogenated microcrystalline silicon thin films, 322
Silicon oxide
Characterization of fluorine-doped silicon dioxide film by Raman spectroscopy, 167
SiO_2 films
The effect of thermal annealing on aerosol–gel deposited SiO_2 films: a FTIR deconvolution study, 47
Sputtering
Electrical resistivity, structure and composition of d.c. sputtered WN_x films, 222
Influence of annealing on the ferroelectric properties of $Pt/Pb(Zr,Ti)O_3/Pt$ thin film capacitors, 327
Sputter deposition of ZnS:Mn/SrS:Ce multilayered thin film white phosphor, 123
Structures and vapor-sorption characteristics of sputtered polychlorotrifluoroethylene films treated by hydrogen-plasma, 303
Steel
Generation of boride layers on steel and nickel alloys by plasma activation of boron trifluoride, 244
Stress
Change of light holes valence band in lead–tin telluride films by isovalent substitution of chalcogen atoms, 194
Residual stress in silicon films deposited by LPCVD from disilane, 234
Sulphides
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Sputter deposition of ZnS:Mn/SrS:Ce multilayered thin film white phosphor, 123
Surface morphology
Corrosion behavior and microstructure of titanium implanted with α and β stabilizing elements, 251
Electrochemical behaviour of molybdenum coated with flame CVD polycrystalline diamond film, 217
Preparation and characterisation of silver particulate films on softened polystyrene substrates, 97
Surface potential
Analysis of Au-, Al-, and Sn/Si semiconductor devices with thin oxide layer by photocurrent measurements, 177
Surface roughness
Determination of the relative surface areas of PVD coatings by electrochemical impedance spectroscopy, 87

Terbium
Luminescence properties of the Langmuir–Blodgett film of terbium(III) stearoylanthranilate, 274
Thermal annealing
The effect of thermal annealing on aerosol–gel deposited SiO_2 films: a FTIR deconvolution study, 47
Thermionic emmission
Charge conduction process and photovoltaic effects in thiazole yellow (TY) thin film based Schottky devices, 279
Thermoelectric transport properties
Phase formation process of Ir_xSi_{1-x} thin films. Structure and electrical properties, 8
Thin films
Characterization of ultrasonic spray pyrolysed ruthenium oxide thin films, 57
Large-grain polycrystalline silicon thin films obtained by low-temperature stepwise annealing of hydrogenated amorphous silicon, 67
Low-temperature growth and orientational control in RuO_2 thin films by metal-organic chemical vapor deposition, 75
Nondestructive acoustic microcharacterisation of heteropolysiloxane thin films, 203
Phase formation process of Ir_xSi_{1-x} thin films. Structure and electrical properties, 8
Tin oxide
Effect of Nb, Cr, Sn additions on gas sensing properties of TiO_2 thin films, 161
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
Titania deposits
Acoustic emission responses of plasma-sprayed alumina-3% titania deposits, 108
Titanium
Corrosion behavior and microstructure of titanium implanted with α and β stabilizing elements, 251
Titanium oxide
Effect of Nb, Cr, Sn additions on gas sensing properties of TiO_2 thin films, 161
Epitaxial growth of titanium oxide thin films on MgO(100) single-crystal substrates by reactive deposition methods, 184
Surface characterization of titanium oxide films synthesized by ion beam enhanced deposition, 29

Ultrafine particles
Preparation of nanocrystalline SnO_2 thin film coated Al_2O_3 ultrafine particles by fluidized chemical vapor deposition, 238
Ultrasonic spray pyrolysis
Characterization of ultrasonic spray pyrolysed ruthenium oxide thin films, 57

Vacancies
Photoconductors based on $Zn_xCd_{1-x}S$ and $CdSe_{1-y}S_y$ thin films, fabricated with multilayer structure, 310
Vanadium
Preparation of $AlVO_4$-films for sensor application via a sol–gel/spin-coating technique, 228
VRH
Magneto-transport in porous silicon, 94

WN_x
Electrical resistivity, structure and composition of d.c. sputtered WN_x films, 222

X-ray photoelectron spectroscopy (XPS)
Preparation and characterisation of silver particulate films on softened polystyrene substrates, 97
X-ray diffraction
Effects of $p(O_2)$ and $p(CO_2)$ on epitaxial growth of $BaTiO_3$ thin films on MgO(100) substrates by using metal organic acid salts, 199
Influence of conventional furnace and rapid thermal annealing on the quality of polycrystalline β-$FeSi_2$ thin films grown from vapor-deposited Fe/Si multilayers, 115
Morphological changes induced by thermal anneals in NiFe/Ag multilayers; their relation to the resistive and magnetoresistive properties, 171
XRD
Electrical resistivity, structure and composition of d.c. sputtered WN_x films, 222
